WESTCHESTER COUNTY DEPARTMENT OF SENIOR PROGRAMS AND SERVICES

Westchester County Department of Senior Programs and Services is dedicated to serving seniors and their families. We strive to identify and prioritize their needs and create comprehensive plans to meet them. We advocate for responsive policies, programs, legislation and resources on behalf of seniors, their families and caregivers. We also maintain an inventory of services available to older persons and serve as an information and referral point for local and national assistance.

The department is part of a National Network on Aging, which includes the Administration on Aging and the U.S. Department of Health and Human Services. There are also 59 State Agencies on Aging, 670 Area Agencies on Aging and approximately 27,000 local service provider organizations under contract to the area agencies. Under the Older Americans Act of 1965, this network administers programs designed to help the elderly maintain their health and independence in their homes and communities.

The Westchester County Department of Senior Programs and Services works to meet the missions of the Older Americans Act and the New York State Community Services for the Elderly Act. The goals of the federal and state acts are aimed at enhancing seniors' quality of life by encouraging:

- *Sufficient income to meet basic needs*
- *Appropriate housing according to individual needs and wishes*
- *Employment opportunities*
- *Dignified, honorable and healthful retirement*
- *Freedom to pursue meaningful activities*
- *The best physical and mental health available*
- *Services to restore health to the best possible state*
- *Benefits from social and medical research as soon as possible*
- *Adequate community services*
- *Initiative, freedom and independence to manage and plan their lives*

TIPS – Telehealth Intervention Programs for Seniors

TIPS uses electronic information and communication technologies to provide and support health benefits to increase quality of care, expand healthcare access and reduce healthcare costs.

TIPS combines three key elements to help seniors age successfully:

1. Clinical monitoring of vital signs, including blood pressure, pulse, oxygen levels and weight.
2. A complete social check-up to make sure seniors are aware of all the services and programs available – whether it be nutrition, housing, transportation, caregiving or any of our other support programs.
3. Hands-on, intergenerational support from a network of volunteers, including student technicians and nurses from various colleges and universities.

TIPS participants have their vital signs – blood pressure, pulse, blood oxygen levels and weight – checked twice a week by a trained technician. The data is transmitted to a nurse who reviews it remotely and sends messages back to be reviewed at the next session. If there is cause for immediate concern, the nurse may contact the patient, caregiver, primary care physician or on-site administrator directly.* Participants leave each session with a “TIPS Sheet” that includes their vital signs, an explanation of what the results mean, and any relevant recommendations or referrals. This information can help seniors self-manage their own health and be proactive if they see any negative changes.

*telehealth solutions are not intended for emergency use or real-time monitoring of patient vital signs.
